

Bit holder CentroFix Super Slim mechanically lockable 1/4", magnetic (39134) 66 mm

- Saves time: Automatic locking of the bits when plugged in
- Increases your efficiency: Good access to deep-seated screws due to extremely slim design
- Screws in tightly dimensioned blind holes can often be difficult to reach with the bit. The mechanically lockable bit holder CentroFix SuperSlim guarantees best accessibility, even for screws in narrow working spaces. Thanks to its outer diameter, which is up to 30% smaller than that of conventional quick-change holders, it easily reaches deep-set screws. The bit holder is compatible with all bits with 1/4" hexagonal drive form C 6.3 and E 6.3. The bit is automatically locked when inserted (SelfLock). Unlocking via the actuating sleeve releases the bit for removal (EasyOut). The bit holder also features a robust stainless steel sleeve and a strong neodymium magnet.
- application: Particularly suitable for applications in confined working environments. Ideal for screw profiles (e.g. TORX®) that tend to jam in the screw.

Alternative item description	7148CS
item number	WL52361
model	7148CS
manufacturer	WIHA
manufacturer item number	39134
order unit	1 piece
content unit	1 piece
product series	7148 CS
VDE	no
ESD safe	no
packaging mass	piece
tool length	66 mm
blade length	66 mm
