

CP desoldering station with AM120-A E micro desoldering tweezers, CP-2QF

The station is suitable for soldering and rework of SMD components such as chips, small/medium SOP components and two-conductor components

- quick and easy configuration of the station thanks to the 7-key keyboard
- Tip holder for storing up to 4 tips, as well as tip extractor and cable collector
- Connectivity to JBC suction

item number	WL52688
model line	Compact Line
manufacturer	JBC
manufacturer item number	CP-2QF
scope of supply	1x control unit

	1x AM120-A adjustable desoldering tweezers (tips not included)
order unit	1 piece
content unit	1 piece
nominal power	80 W
voltage	230 V
temperature range °C	90 – 450 °C
station type	desoldering station
included handpiece	AM120-A
ESD safe	yes
