

## Flat round nose pliers with 45° cranked tip, VDE insulated, 200 mm

3-layer coating with different colours to indicate application safety: safe, dangerous or very dangerous. A fourth, black layer for additional protection of the grip edges

- Fire coated insulation
- 3-layer insulation, colour-coded for safety
- For work on live equipment up to 1000 V according to IEC 60900
- Tip angled at 45°
- Sharp edges for cutting soft materials such as copper and plastic coated wires
- Main part made of high-performance steel alloy
- Chrome-plated, rust protection treated
- Standards: ISO 5745
- 3-layer coating with different colours to indicate application safety: safe, dangerous or very dangerous. A fourth, black layer for additional protection of the grip edges
- This offers protection and an optical warning system
- If the outer layer is damaged, the lighter colour underneath becomes visible and warns the operator
- Each tool is tested for 10 seconds at 10,000 V at the end of the production process
