

TM- Palletizer incl. TM12-1300, gripper, controller

TM palletizing robot is a complete solution designed exclusively for palletizing automation. The system includes integrated guidance software that allows users to quickly set up their palletizing specifications. Palletizing simulations and collision tests can also be performed in advance. This solution is suitable for many industries such as warehousing, logistics, food processing, manufacturing and many more.

- 16 certified safety functions at PL = d cell level
- Palletising speed of up to 7 cartons per minute
- Maximum stacking height of 1900 mm, normally 1200 mm
- TMstudio Palletizing Wizard - Easy palletizing with simulation and collision detection
