

Onrobot 3FG15 3 Finger Gripper

Onrobot 3FG15 3 Finger Gripper:

- Flexible production - large stroke optimizes CNC loading for different part sizes with a single three-finger gripper.
- Accurate centric positioning results in higher quality, consistency and performance with minimal programming effort
- Strong, stable grip with 3 contact points makes the gripper quick and easy to change over to different processes
- Adaptable fingertips allow flexible gripping of a wide range of part sizes and shapes
- A Quick Changer or Dual Quick Changer is required

Applications:

- Machine loading
- material handling

Can be used with products of different sizes and with different materials, including:

Products for the electronic industry

- Plastic
- metal
- cardboard
- wood
