

## E-screwdriver speedE® II electric 7 pcs with slimBits, batteries and USB charger in L-Boxx Mini.

Different tasks, different requirements: You decide what you need. With the speedE II set, matching accessory modules and torque adapters, everyone can put together all the parts they need individually.

- Meets your demands: Quality and robustness made in Germany
- Simplifies your work: Maximum illumination of the working area thanks to ring LED light
- Facilitates handling: Unique ring switch enables operation in all working positions
- Protects your health: For work that is easy on the hands and muscles. Recommended by German doctors and therapists of the AGR
- Increases your efficiency: 100% compatible with the Wiha Electric Vario Family
- Offers you full protection: slimBits tested at 10,000 V AC and approved for 1,000 V AC
- Increases your speed: 3 x faster working thanks to electric drive
- Protects your material: electrical screwing with protective function to prevent material damage

- Several screwings a day, hundreds of screwings a week. As a craftsman, you invest a lot of time and energy in constantly recurring screwdriving work. The resulting pain in the wrists cannot be blamed on the body. Thanks to the electric drive of the speedE® II e-screwdriver, joints and tendons are protected, especially during continuous use. In addition, the time required is reduced by a factor of 3. Another highlight of the speedE II is the integrated material protection function. In the case of sensitive screw connections, such as plastic covers for sockets, it is important not to overtighten, as this can damage the material. In this case, the speedE II automatically switches off at 0.4 Nm and leaves the user in full control to sensitively complete the final tightening by hand. If screwdriving tasks require more force, the second generation speedE® offers the option of increasing the electrical force to 1.0 Nm using a slide switch. The colour of the slimBits serves as an aid to ensure that the correct force level is set according to the respective application. The red slimBits with the smaller profiles are used in the red sliding position, the yellow Power slimBits with the larger profiles indicate that work can be carried out in the more powerful yellow sliding position. If more force is ever needed, the speedE® II can still be used to manually apply up to 12 Nm without being damaged. During the electrical screwing process, the integrated LED provides permanent light for an optimum view of the screw. Thus, in poorly lit working environments, the luminous LED can be used as a flashlight by tapping the ring switch. The enlarged ring switch and the smooth rotation guarantee even greater ease of use. Thanks to the combination of ease of use and the ergonomic SoftFinish® handle shape, the speedE® II electric screwdriver is recommended by German doctors and therapists of the AGR. The set includes one red and one yellow slimBit, a USB battery charger and two standard 18500 batteries, enabling continuous working
- Application: Ideal tool for all screwing work, e.g. socket assembly, work in the control cabinet, industrial maintenance and assembly, maintenance and repair of power equipment, household appliances and white goods, window and door assembly, heating, air conditioning and plumbing installations and repair of bicycle, motorcycle and lawn mower. Also perfect in the home for furniture assembly, repairs and other hobby screwdriving tasks.

Alternative item description	591T101
<b>item number</b>	<b>WL55154</b>
model	591T101
manufacturer	WIHA
manufacturer item number	44318
length	202 mm
width	39 mm
height	39 mm
scope of supply	1 x battery set 18500 Li-Ion 2 pcs. in box (41914) 1 x Bit slimBit electric PlusMinus/Pozidriv (34590) SL/PZ2 x 75 mm

1 x Bit slimBit electric slot (41159) 3,5 mm x 75 mm  
 1 x electric screwdriver speedE® handle  
 1 x charger for battery type 18500 Li-Ion with USB and Euro plug (41915)  
 1 x L-BOXX Mini for speedE®
