

Installation pliers TriCut Professional electric 1/4" in blister pack

- Simplifies your work: the angled head shape allows you to work in hard-to-reach places such as junction and distribution boxes
- Soft wire: 4 mm, medium hard wire: 2.5 mm, hard wire 1.6 mm
- Reduces your costs: Long-lasting due to high-quality chrome-plated pliers surface to prevent rusting
- Saves money: You only need one tool for the three processes of cutting to length, stripping and stripping.
- Increases your efficiency: Three tools in one. Saves 60 % volume, 50 % weight, for 100 % efficiency
- Offers you full protection: Each tool individually tested at 10,000 V AC and approved for 1,000 V AC
- The TriCut installation pliers electric does the work of three. The high-quality manufactured installation pliers are the optimal helper for cable processing, because they combine the three most important tools in one: a side cutter, a stripper and a wire stripper. The specially cranked pliers head enables ergonomic and effort-saving stripping and stripping in the longitudinal direction of the cable and the pliers. This gives the TriCut a decisive advantage over other pliers, especially in confined spaces such as junction and distribution boxes. In addition to cables, the side cutter can also be used to cut harder wires or even chains. The extra wide back of the handle with integrated hard and soft zones as well as the curved handle ends prevent the fingers from slipping. The pliers, which have been unit-tested in accordance with the international IEC 60900 standard, guarantee uncompromising safety and enable safe working on live parts up to 1,000 V AC
- Standards: Tested according to IEC 60900
- Application: Suitable for cutting soft and hard wires as well as cables, e.g. NYM cables. Also suitable for stripping round and damp room cables as well as stripping conductors even in hard-to-reach places such as junction and distribution boxes.
