

ESD sandal XP 355 2.0, S1P, Sportline, unisex, black/royal blue, size 36

Description

ATLAS® brings together the most modern technologies and the anatomical needs of every wearer. The new INNOFLEX SYSTEM® is a holistic running sole concept and supports the runner in every phase of movement. From the first to the last contact with the ground, the sole complex is permanently guided by the same, natural line of force, the INNOFLEX LINE. It optimally guides the forces from the heel to the toe and thus supports the natural line of force progression. Special areas such as the CLOUDZONE in the heel are responsible for the corresponding energy absorption, i.e. damping. The large-format tread surfaces, which are equipped with particularly energy-absorbing MPU® material, absorb the energy and return it to the movement process in a targeted manner. This guarantees fatigue-free running throughout the entire working day.

The SportLine upper is a fabric made of textile fibres that combines various advantages. The fabric is particularly permeable to air, has a breathable effect and thus offers a very pleasant wearing comfort. Thanks to its hydrophobic properties, it is also water-repellent, quick-drying and hard-wearing.

With the puncture-resistant XP® technology, ATLAS® offers an innovative system to protect the foot against sharp objects such as nails. For this purpose, a textile high-tech material is used, which contains aramid fibres, among other things. The increased safety is not at the expense of wearing comfort, because the textile is metal-free, extremely light and supports the natural torsion of the foot.

The anatomically shaped steel toe cap protects the foot in the toe area against impact of at least 200 joules and a compressive stress of at least 15 kN, according to EN ISO 20345:2012.

Especially during kneeling activities, signs of wear can occur in the area of the toe of the shoe after some time. These can be significantly reduced with the help of the abrasion-resistant MPU toe protection and the service life of the shoe is thus increased.

Especially in everyday working life, with high physical stress, temperature-regulating properties are not only required but expected. The aktiv-X functional lining stands for highest quality, innovative technology and offers the wearer a permanent, active moisture regulation. The aktiv-X functional lining has a moisture regulating effect and ensures that the shoes dry again quickly. It does not stain, is skin-friendly and abrasion-resistant.

Work healthier with the right cushioning. The new 3D cushioning system from ATLAS® makes walking noticeably gentler and less tiring. The basis for this outstanding walking comfort is formed by three basic components: Pressure relief. Cushioning. Dynamics. This is ensured by the perfect interaction of a pressure-relieving insole and the light and responsive MPU sole technology.

The ATLAS® clima-stream® concept maximises breathability, balances moisture inside the shoe and optimally regulates the temperature of the environment. The use of high-quality, particularly breathable upper material, the thermoregulating inner lining and the Klima Komfort® insole ensures a unique wearing sensation.

ATLAS® offers a wide range of orthopaedic insoles. The articles marked here are suitable for orthopaedic insoles according to DGUV regulation 112-191. The marking in the shoe is decisive for this.

Product details

model line	XP 355 2.0 ESD
item number	WL59242
manufacturer	ATLAS
colour manufacturer	black / royal blue
manufacturer item number	35000-1P-36
model	XP 355 2.0 ESD
order unit	pair
shoe width	W10 (standard width)
shoe sole	MPU INNOFLEX system
safety class	S1P
shoe execution	sandal
Puncture resistance	XP metal-free penetration protection

Products for the electronic industry
