

PCB Separator MAESTRO 6/903, cut-off length 900 mm

Cutting of pre-scored PCBs up to 1,500 mm length with minimum stress on components
The MAESTRO 6 is the consequent further development of the proven cab depanelling machines.

Even very long panels are separated quickly, economically and stress-free.

The carriage drive is located directly behind the linear knife.

This simplifies the separation and removal of the PCBs considerably.

- Cutting length up to 900 mm
- Easy and quick change of FR4/CEM-3 knives to aluminium knives and back again
- Distance of the roller knives to the linear knife individually adjustable
- Rolling knife diameter 60 mm
- Component height: assembly side up to 10 mm, solder side up to 22 mm
- width x depth x height: 1450 x 350 x 450 mm
- Weight: 55 kg
- Separation principle: placement side roller blade, solder side linear blade
- Separation process: path-optimized
- Cutting speed up to 500 mm/s, up to 250 mm/s for aluminium
- Deposit table depth: 160 mm
- Voltage 100-240 VAC, 50/60 Hz
- Emission sound pressure level LpA < 70 dB (A)
- Approvals CE, FCC Class A

item number

WL60386

model line

MAESTRO 6

Products for the electronic industry

manufacturer	CAB
manufacturer item number	8936500
scope of supply	Depanelizer Mains cable type E+F, length 1.8 m Foot switch Hexagonal wrench 2 mm Measuring deviceOperating instructions DE/EN
