

PCB Separator MAESTRO 6/901, cut-off length 900 mm

Cutting of pre-scored PCBs up to 1,500 mm length with minimum stress on components
The MAESTRO 6 is the consequent further development of the proven cab depanelling machines.

Even very long panels are separated quickly, economically and stress-free.

The carriage drive is located directly behind the linear knife.

This simplifies the separation and removal of the PCBs considerably.

- Separation of PCB materials FR 4 and CEM3 up to a length of 900 mm
- component height assembly side up to 34 mm, solder side up to 22 mm
- W x H x D: 1450x410x450 mm
- Weight: 55 kg
- Separation principle: placement side roller blade, solder side linear blade
- Separation process: path optimized
- Cutting speed up to 500 mm/s
- Roller blade diameter 125 mm
- Deposit table depth: 160 mm
- Voltage 100-240 VAC, 50/60 Hz
- Emission sound pressure level LpA < 70 dB (A)
- Approvals CE, FCC Class A
