

## Bended needles and suction cups for T260, NBC260

---

These accessories allow the adjustment to weight and size of any type of component. The suction cups can be adjusted to the needles in order to make the placement of SMD to different sizes on board easier. When you assemble the suction cup with the needle, you should avoid the needle to stick out of the lower part. These needles are supplied with JNA High-Precision Hot Air Station and work with T260 Pick & Place.

- This accessory allows adjustment to the weight and size of any type of component.
- The suction cups can be adapted to the needles to facilitate the placement of SMD of different sizes on the board.
- When you mount the suction cup with the needle, you should avoid the needle protruding from the bottom part.
- These needles are supplied with the JNA high precision hot air station and work with T260 Pick & Place
