

Attachment lens NZ.8904, 0.4x magnification, for Euromex stereomicroscopes

The attachment lenses extend the range of total magnification and field of view. The attachment lens NZ.8904 with 0.4x magnification has a working distance of 220 mm.

With the NexusZoom stereo microscopes from Euromex you can examine your samples with the highest precision. The microscope generates two- and three-dimensional images for even the most demanding microscopy applications. The ESD safe zoom microscopes are perfect for inspecting any surface or for observing larger objects in the electronics industry. With additional objectives and attachment lenses, magnifications from 3.3 to 180 times can be achieved.

- Total magnification: 2.6-22.0
- Field of view: 88.5-10.5 mm
- Compatible with NexusZoom-A and NexusZoom-AP models
