

## Soldering tip with twist protection, chisel shape, 1.6 x 0.7 mm

---

---

The XTR CCT soldering tip from Weller is a chisel-shaped soldering tip with anti-twist protection for the WP 120 and WXP 120 soldering irons. The integrated anti-twist protection ensures that the tip sits securely in the handpiece and does not twist during soldering.

With a tip width of 1.6 mm and a tip thickness of 0.6 mm, the tip is suitable for precise soldering work on medium-sized solder joints. The straight chisel shape enables good heat transfer and controlled work.

The soldering tip is part of the XTR tip series, has a diameter of 6 mm and an overall length of 35.5 mm. It is supplied as a single piece.

- with anti-twist protection
- for WP120/WXP120

Item no.

WL61019
