

## TM-Mobile Workstation ESD, suitable for TM Robot

---

Sample application  
TM robot not included

---

The TM Mobile Workstation with integrated work area - can be used both individually and flexibly. The control system is stowed inside the workstation and is easily accessible through side openings. Optionally with built-in PLC, compressed air connections and TP-100-1 TM Kit.

The example application shows the open variant of a modular robot cell. This creates the conditions and application possibilities for human-machine interaction. The central aspect is the collaboration between the employee and the cobot. The modular robot cells can be used in a wide range of applications and stand for flexibility and reliability.

Feel free to contact us, together we will develop a suitable solution for your application.

TM Mobile Workstation ESD without assembly - robot arms and other accessories from TM Robot are not included and are available separately.
