

ERSA i-Tool Nitrogen Upgrade Kit

- The N2 kit heats nitrogen and supplies it to the soldering area of the soldering iron. This prevents oxidation processes at the soldering point and at the soldering tip and heats the soldering environment. Suitable soldering tips are those which are not larger than 5 mm and which, due to their shape and length, can be easily flowed around by the nitrogen.

Item no.	WL61177
Manufacturer	ERSA
Manufacturer article no.	0109IN2-UKIT
GPSR manufacturer data	ERSA GmbH Leonhard-Karl-Strasse 24 DE-97877 Wertheim www.ersa.de
Sales unit	1 piece
Content unit	1 piece
