

"Screwdriver" tool set, 6 pieces

VDE safety in a set: high-quality basic equipment also for on the go: Three VDE-tested pliers for holding, cutting and positioning

Voltage insulated combination pliers, side cutters and flat round pliers have become classics in the Knipex product range with good reason. Basic operations such as holding, gripping, cutting and positioning are easily accomplished with these three forged and oil-hardened pliers. The high-quality chrome plating provides good protection against corrosion. A collar is formed at the front of all pliers handles to prevent the hand from slipping.

Well suited as a supplement or as a second tool for on the road

The 00 20 12 electrical package provides a useful basic tool kit for working on electrical systems. This is ideal, for example, when electricians are on the road on installation projects and only want to carry the tools required for frequently recurring work processes. The electrical package is also useful for electricians who only occasionally work on or near

Products for the electronic industry

live parts and therefore do not need extensive VDE pliers equipment.

Safety, utility and quality in a package

Knipex focuses on safety, user benefit and quality. With the VDE combination pliers you can also hold and powerfully cut live flat and round material. The VDE side cutter convinces with high cutting force with low manual force and long service life. In the VDE flat round pliers, the elastic tips on the flat-round, long jaws are also highly durable; their cutting edges are hardened to 61 HRC. Knipex has put together these high-quality pliers in the 00 20 12 electric set: for utility, quality and safety in a package.
