

Optimum cartridge container (without screw cap), 20 fl oz (600 ml)

Molded from high-strength transparent plastic, Optimum® cartridge container systems make it easy to visually monitor fluid levels during dispensing.

Large, textured ribs provide an ergonomic grip for simplified holding cap installation. Locking tabs snap into the recesses on the holder body with an audible click to confirm proper installation with minimal effort. This holds the cartridges securely in the holder during use.

A convenient push-in connection for the air line on top of the cap eliminates the need for bayonet connections.

Item no.	WL63342
Manufacturer	NORDSON EFD
Manufacturer article no.	7013860

Products for the electronic industry
