SET jaws 100 mm

The plastic jaws fit perfectly to any vice with steel jaws due to their double magnetic bar. They protect sensitive components from scratching or damage. Due to the longitudinal and transverse grooves, even round objects can be clamped securely. If the grooves interfere with clamping, the smooth surface of the other side can also be used. The aluminium jaws also protect the parts to be machined. The longitudinal and transverse grooves allow raw or flat material to be fixed securely and firmly in the vice.

- suitable for vice jaws width 100 mm, content: article listing see below
- with magnetic strips or magnetic points
- for clamping parts with scratch-sensitive surfaces
- plastic yellow glued with felt, cork, leather. Aluminium with rubber
- FELT = synthetic fleece fibres (grey) very robust durable stable felt, lint-free
- LEDER = hard-wearing, optimal wear behaviour, water drop resistance
- CORK OAK = very elastic, poorly combustible, natural and sustainable raw material
- further jaws search field entry 9-900
- approx. dimensions 430 x 390 mm

• weight 761 g

Item no.	WL63436
Manufacturer	BERNSTEIN
Manufacturer article no.	9-900-SET-100
