

## Optimum cartridge, 32 fl oz (960 ml)

---

---

Optimum® cartridges are molded from a proprietary polypropylene formulation and offer exceptional transparency, chemical compatibility, impact resistance and dimensional stability.

Zero Draft™ design features a uniform inner diameter along the entire cartridge length with no stem-reducing or result-impairing plug movement, allowing for improved material flow characteristics and reduced turbulence

Unique reinforcing ribs at the outlet prevent cracking when installing fittings or nozzles. The 1/4" NPT outlet has a precision-molded thread and tapered counterbore for a tight, leak-proof seal.

The hexagonal outlet fits into the corresponding opening of the cartridge container, allowing fittings and nozzles to be installed quickly without the use of tools.

Item no.

WL63480
