

Optimum® cartridge end caps

Optimum® cartridge end caps provide an airtight seal at the top of cartridges. Self-venting threaded outlet caps prevent leaks and prevent air from entering the liquid. End caps prevent leakage and fluid contamination by fitting securely onto the cartridges. A central push button presses the end cap airtight against the cartridge wall.

A large, ribbed grip area simplifies manual installation of Optimum end caps. Precisely formed threads and a conical seat ensure a tight, leak-proof seal. A recessed hexagon molded into the outside of the cap allows for easy installation with automated dispensing equipment.

Item no.	WL63481
Manufacturer	NORDSON EFD
Manufacturer article no.	7012425

GPSR manufacturer data	Nordson Deutschland GmbH Kapellenstraße 12 DE-85622 Feldkirchen www.nordson.com
Sales unit	1 PU
Content unit	10 piece
Colour	blue
Incl. battery	no
ESD compliant	no
