

Set of dowel pins for SPANNFIX 9-290 (VE4)

The four clamping pins can be used to clamp different shapes, whether round or square. The clamping horns adapt to the product in shape and size. They can be rotated in the axis and have a firm grip on any object. The centering eye ensures plumb work. The workpiece can be aligned and machined in balance.

The SPANNFIX is a universal ball joint clamping device. A third hand as a useful clamping and holding device with quick clamping mechanism, a useful aid in every workshop.
