

ESD Sneaker QS 500 ESD natural leather Black 1011363, normal, 41

The QS500 safety shoe from BIRKENSTOCK with replaceable footbed provides secure support and relieves pressure on your feet so that you can stand, walk and run comfortably for many hours a day at work, even in a challenging environment. The QS500 presents itself as a simple, modern sneaker with 6-hole lacing.

This ESD version was specially developed for people who work in the microelectronic field or with high frequency technology. ESD stands for Electro Static Discharge. These shoe models actively ensure a permanent gentle discharge of their wearer. The antistatic elements in the sole compensate for potential electrical voltage differences between humans and the work environment by permanently "grounding" the feet and can be identified by the circular yellow emblem. Warning: The ESD range is up to 35 MOhm, so it does not have an insulating effect!

The slip-resistant, metal-free and oil and petrol-resistant outsole also provides energy absorption in the heel area and is puncture-resistant. A 200 Joule steel toe cap with

scratch resistant cap protection protects the forefoot. The upper is made of water-repellent smooth leather (WRU) and offers antistatic protection.

The shoe is certified according to EN ISO 20345:2011 and meets the requirements of protection class S3.

- Replaceable, anatomically shaped cork microfibre footbed
- Material: water-repellent smooth leather (WRU)
- Cover sole: microfibre
- Sole: nitrile rubber (SRC)
- Details: steel toecap (200 Joule) with scratch-resistant cap protection; anti-puncture, metal-free, slip-resistant and oil & petrol-resistant outsole (P, SRC, FO); energy absorption in the heel area (E); ESD protection (A)
- Certified safety shoe according to EN ISO 20345:2011
- Protection class S3
