

ESD Clog Kay ESD 1020876, flowersfieldmint, narrow, 42

The BIRKENSTOCK Clog Kay has two straps, one of which is fixed to the upper. The second strap can be folded down by the hidden rivet on the side and worn as required either on the upper or as a supportive heel strap.

This ESD version was specially developed for people who work in the microelectronic field or with high frequency technology. ESD stands for Electro Static Discharge. These shoe models actively ensure a permanent gentle discharge of their wearer. The antistatic elements in the sole compensate for potential electrical voltage differences between humans and the work environment by permanently "grounding" the feet and can be identified by the circular yellow emblem. Warning: The ESD range is up to 34 MOhm, so it does not have an insulating effect!

The upper material consists of the skin-friendly and hard-wearing synthetic material Birko-Flor®.

The shoe is tested according to the specifications of EN ISO 61340.

- Anatomically shaped cork-latex footbed

Products for the electronic industry

- Upper material: Birko-Flor®-
- Cover sole: Suede leather
- Sole: EVA with Electro Static Discharge (ESD)
- Details: two straps, each with an individually adjustable metal thorn buckle
- Tested according to EN ISO 61340
