

PU clogs BIRKI-AIR AS 63050, green-antistatic, normal, 38

Safety and comfort from a single source: the Birki Air Antistatic model is one of our classic and preferred shoes in the clog range. Recognizable by its high-closed shape, this clog made of antistatic polyurethane offers ideal wearing comfort with safety and firm support. The large air inlets in the forefoot area ensure a permanently fresh foot climate. The original PU footbed by BIRKENSTOCK supports the natural anatomy of the foot and thus prevents posture and joint damage as well as muscle fatigue. It can be replaced if necessary and, like the entire clog, has been tested for antistatic properties. The clog is oil and grease resistant. It can be washed at up to 80 °C, the replaceable footbed at up to 60 °C and effectively disinfected.

- Replaceable anatomically shaped PU footbed, antistatic and washable at
- washable at up to 60°C
- Material: PU (polyurethane) with lateral air inlets
- Cover sole: microfibre
- Sole: PU (polyurethane), antistatic

- Antistatic properties
