

LED Magnifying Lamp Omega 3.5

The Omega 3.5 LED Magnifier Light from Daylight is a compact and lightweight magnifier light with a 9cm 5-diopter (2.25X) acrylic magnifying lens. The bright daylight LED ring around the magnifying lens provides even illumination for precise inspection and recognition of fine detail - choose your desired light intensity from 4 brightness levels. The free-moving head joint and 68cm long arm with 2 flexible sections, allows for precise positioning. The low-maintenance arm with silicone coating easily disassembles into 2 sections; for easy storage in the carrying bag. The slim profile clamp takes up little space on your workstation and its flat side fits through between work tables. While used as a light, the lens can be covered. Carrying case included.

- Compact loupe head with lightweight 9 cm (5D / 2.25X) acrylic lens
- Arm can be split into two parts for easy storage
- Swivel head joint to allow accurate positioning
- Silicone coated arm with long reach and two flexible sections
