

Nut magnetic bar A Deep 1 socket set, 1/4" drive, 9 pieces

Nut magnetic bar with 9 long hand and machine sockets (non-impact), 1/4". Smooth turning mechanism provides a secure hold and easy removal of the sockets. Long 1/4" hand and machine socket wrench inserts (ISO 2725-Part 3) from Wera for use in hand and machine operation (non-impact) even with low-lying screwed connections and protruding threaded rods. With Take it easy tool finder with color coding according to sizes - for easy and fast finding of the required tool. Easy to grip even with oily hands. With hexagonal profile and ball catch groove. The hexagonal profile allows the transmission of high forces and puts less stress on the edges of the nut or bolt head than a twelve-sided profile. Fine-toothed ratchets also make the use of a twelve-sided profile unnecessary, even in confined spaces, due to their small back-swing angle. For hexagon head screws and nuts. The magnetic bar allows temporary attachment to metal surfaces and features secure nut locking and unlocking thanks to the twist to unlock function.

- 9-piece socket set on a socket magnetic strip, 1/4"
- Magnetic strip with secure socket holder and yet easy removal (twist to unlock) for temporary attachment to the wall, shelf or workshop trolley
- Smooth-running rotating mechanism for a secure hold and easy removal of the tools
- Long 1/4" socket wrench for low-lying screw connections in tight spaces and protruding threaded rods
- Hexagonal profile enables precise and profile-friendly screwing with high power transmission

item number	WL70754
model	Nuss-Magnetleiste A Deep 1
manufacturer	WERA
