Stand for AM120 & PA120 soldering tweezers

AMS Stand works exclusively with AM120 & PA120 Micro Tweezers and DIU, DDU and DMU Control Units.
Sleep & Hibernation Mode automatically detects the tool in the stand and reduces the tip temperature below the solder melting point. Hibernation cuts off power supply preventing oxidation. As a result, tip life lasts up to 5 times longer.
The stand includes Tip Cleaner with brass wool, as well as, splashguard and antisplash membrane to keep the work area clean and free of solder particles. Quick Cartridge Changer enables a safe, easy and quick cartridge exchange which, combined with Cartridge Holder, allows you to store up to four cartridges.
The tool holder position is easily adjustable to suit your needs and Cable Collector is designed for perfect movement adaptation and to keep cables away from the working area.
