

## Stand for soldering iron T210/245/470-NA

---

DNS Stand works with T210N and T245N Nitrogen Handles on DIU, DDU and DMU Control Units, and T470N Nitrogen Handle on HDU Control Unit.

Sleep & Hibernation Mode automatically detects the tool in the stand and reduces the tip temperature below the solder melting point. Hibernation cuts off power supply preventing oxidation. As a result, tip life lasts up to 5 times longer.

The stand includes Tip Cleaner with brass wool, as well as, splashguard and antisplash membrane to keep the work area clean and free of solder particles. Quick Cartridge Changer enables a safe, easy and quick cartridge exchange which, combined with Cartridge Holder, allows you to store up to four cartridges.

The tool holder position is easily adjustable to suit your needs and Cable Collector is designed for perfect movement adaptation and to keep cables away from the working area.

- Intelligent temperature management
- Tip cleaner with brass wool and splash protection membrane
- Quick changer for soldering tips

- Tip holder for up to four soldering tips
- Movable cable holder
- Compatible with T210N, T245N and T470N
- ESD safe
- Dimensions: 342 x 155 x 120 mm
