Put an end to pinched fingers. The PocketStar® pin wrench set impresses with optimum handling and great utility, which is expressed in a multitude of practical details. The seven pin keys are stored in a handy folding holder to save space. The clever lift-out button enables simple and easy selection of the desired key size. Between the 90° and 270° positions, any number of working positions can be selected depending on the screwing task. In the 180° position, for example, the tool is converted into a screwdriver. When the wrench is positioned at the 270° stop, the folding holder becomes a tool with a practical lever arm for high torques. Another clever solution is the requirement of users that only one wrench can be moved into the working position at a time. The annoying swinging back of pin wrenches that are not needed is thus eliminated with the PocketStar®.
