

Latchkey hexagonal ball head colored luminous 5.0mm (41899)

Simplifies your work: ball head facilitates access to screws and allows you to work at angles up to 25°.

Increases your efficiency: Colored pin wrenches can be found quickly and easily - even in dark environments thanks to luminous paint with UV light.

Reduces your costs: Reduces "risk of forgetting" in a machine and resulting consequential damage.

Application: Suitable for screwing in hard-to-reach places as well as inserting and screwing into horizontal, slanted or deep blind holes.

The colored pin wrenches are quick and easy to find. What's more, thanks to the luminous coating, they are easy to find even in the dark with the help of the Wiha flashlight with UV light. This reduces the search time for lost pin wrenches and, when servicing equipment, reduces the risk of machine damage due to forgotten tools in the machine. The hexagonal ball head of the pin wrenches enables effortless screwing at an angle of up to 25°.

For mechanical applications

- Blister Pack: No
- ESD Item: No
- Color: dark green
- hexagon socket 1 (mm): 5 mm
- length pin wrench blade (short): 33 mm
- total length (mm): 163 mm
- with battery: No

Item no.	WL72701
Alternative article name	369050F
Manufacturer	WIHA
Manufacturer article no.	41899
