Many pitfalls lurk in classic conductor processing. Faulty stripping of the strands, crimped crimps in the pliers or poorly crimped sleeves are known problems. With the comprehensive set from Wiha, they have the appropriate, professional tools including a large selection of the most common connectors and ferrules clearly arranged for mobile use or for the vehicle combined in an assortment case. "Stripping made easy" promises the automatic wire stripper from Wiha. Stripping cables in the range between 0.03 - 16 mm² is possible with just one pair of pliers. The automatic crimping tool with hexagonal

crimping can process wire-end ferrules from 0.08 to 16 mm² and twin wire-end ferrules up to 10 mm². The crimping tool for insulated cable lugs and contacts is designed for the crimping range of 0.5 - 6 mm² and thus covers a large part of the applications in the field of small and medium cable cross-sections. Wiha's standardized ferrules and connectors have a heat resistance of up to 105° C.
