Increases your efficiency: Extensive tool assortment means you always have the right tool when you need it.

Dimensions: 95,0 x 68,0 x 54,0 cm

Application: Huge selection of insulated tools, put together for working on electric vehicles.

Working on automobiles with an e-drive requires special qualifications of the employees as well as safe, certified equipment. With the eMobility workshop trolley set, the user always has the right tools in the right place for the assembly and repair of hybrid and electric vehicles. Compactly housed, the workshop trolley always ensures the right tool for the application thanks to a convincing equipment of high-quality hand tools. The majority of the hand tools offer safety when working on live parts thanks to their VDE-certified

insulation. Distributed over five drawers, the tools are protected in precisely fitting foam inserts and neatly stowed away. Thanks to the fully extendable drawers, the tools are easily accessible and can be used quickly at any time. With additional storage space and the integrated 4-way power socket, the trolley can be individually expanded, even with electrical equipment. Another advantage of the workshop trolley is the mobile working situation thanks to roller skids that can comfortably transport up to 150 kg of contents within the workshop. At the same time, the brakes on the roller skids ensure absolute stability and steadiness. Thus, the workshop trolley can be used flexibly in mobile use, as a stable work table, as well as storage. From voltage testers to torque wrenches, from protective gloves to warning signs: With the fully equipped workshop trolley, you always have the right Wiha tool at hand.

Work on e-vehicles may only be carried out by qualified and authorized specialist personnel.
