

## L-key set in ErgoStar holder hexagonal ball head MagicRing® 10 pcs. luminous colored in blister (43850).

Simplifies your work: Spherical head facilitates access to screws and allows working at an angle of up to 25°.

Lowers your costs: Reduces "risk of forgetting" in a machine and resulting consequential damage.

Facilitates handling: Always the right wrench in the right place with the ErgoStar holder.

Saves time: Keeps things tidy: Removal and defined insertion into the holder is child's play.

Increases your efficiency: Colored pen keys can be found quickly and easily - even in dark surroundings thanks to luminous paint with UV light.

Increases your efficiency: Quick selection of the required wrench size thanks to color coding.

Increases your efficiency: Wiha MagicRing® holding function holds all hexagonal screws without a magnet.

Application: Suitable for screwing all hexagonal screws and lifting out recessed standard screws as well as inserting and screwing into horizontal, angled or deep blind holes.

Who doesn't know this? With many pin wrench holders, it is awkward to remove individual wrenches or return them to the holder. But the Wiha ErgoStar now puts an end to this, because it solves this problem in an ingenious way. The rotation of a single pin wrench in the holder causes all the other wrenches to turn sideways at the same angle, enabling fast and convenient removal. A clamp in the holder ensures that the keys cannot fall out both when the holder is closed and when it is open. In addition, the colored pin keys can be found quickly and easily and, thanks to the luminous paint, are easy to find even in the dark with UV light. This reduces the time needed to find lost pin wrenches, and when servicing equipment, the risk of forgotten tools in the machine is reduced. Thanks to the MagicRing® holding function with spring steel ring, the pin wrenches hold all hexagonal standard screws perfectly in any position without a magnet. The hexagonal ball head enables effortless screwing at an angle of up to 25°. The pin wrench set contains nine

colored hexagonal pin wrenches in common sizes.

For applications in mechanics

Contents:

1x ErgoStar holder

1x L-key hexagonal ball end colored luminous 1.5mm (41894)

1x L-key hexagonal spherical head colored luminous 2.0mm (41895)

1x L-key hexagonal spherical head colored luminous 2,5mm (41896)

1x L-key hexagonal spherical head MagicRing® colored luminous 3,0mm (41973)

1x L-key hexagonal spherical head MagicRing® luminous colored 4.0mm (41974)

1x L-key hexagonal spherical head MagicRing® colored luminous 5,0mm (41975)

1x L-key hexagonal spherical head MagicRing® colored luminous 6,0mm (41976)

1x L-key hexagonal spherical head MagicRing® colored luminous 8,0mm (41977)

1x pin wrench hexagonal ball head MagicRing® colored luminous 10,0mm (41978)

• Blister packaging: Yes

• ESD Article: No

• with battery: No
