

Electrician's hammer with 300 g hammer head in blister 283mm (42071)

Simplifies your work: flat claws allow easy removal of nail clamps and nails.

Increases your efficiency: perfect balance thanks to optimal weight distribution for effective handling.

Improves accessibility: Perfectly suited for use in confined work environments thanks to the combination of square and round head shape.

Increases your work quality: flat bottom of the hammer handle allows damage-free placement of cables and dowels.

Application: For easy removal of nail clamps and nails, placement of cables and dowels. Ideal for use in confined working environments.

Especially in narrow places and corners, conventional locksmith's hammers have hardly any access and not infrequently leave unsightly marks on the surrounding surfaces. Not so with the electrician's hammer from Wiha: With its U-shaped striking surface, it offers optimum accessibility to tight spaces. In addition, the hammer combines ergonomic handling, balanced weight distribution and the ability to remove fasteners such as nail clamps. With optimally balanced weight distribution, it promises the perfect balance for hammering and low-fatigue work. With the help of the flat, straight claws on the hammer head, nail clamps can be removed even in hard-to-reach places and nails can be pulled out of the wall quickly and easily. Furthermore, the flat bottom of the hammer handle allows cables and dowels to be placed without damaging the wall. Thanks to the easy-grip, ergonomically designed handle, the electrician's hammer fits perfectly in the hand and provides a secure grip when striking.

For applications in the electrical industry

- Blister packaging: Yes
- ESD Article: No
- Hammer head height: 23.9 mm
- Total length (mm): 283 mm
- With battery: No
