

Safeguard Walking Test Kit Upgrade Set VMS for SafeGuard electric field meter

The ESD Walking Test Kit consisting of the electric field meter as well as the volt meter set VMS and the voltage measuring head MK is used for precise testing of electrostatic discharge (ESD). The ESD Walking Test Kit also includes a hand electrode and further measuring accessories. An ESD Walking Test Kit is used to determine if a person is properly grounded to dissipate static electricity, reducing the risk of ESD damage to sensitive electronic components. An ESD Walking Test Kit is essential in environments such as electronics manufacturing, repair shops, laboratories or other areas where sensitive electronics are handled. On the one hand, it helps prevent damage to components, and on the other hand, it ensures product quality and reliability of electronic devices.

Please note: Electric field meter is not included.

Existing can be upgraded later with Volt Meter Set VMS. We only need your serial number

- please contact us directly.

Alternative item description	Safeguard WTS PRO
item number	WL73729
manufacturer	KW-SG
manufacturer item number	WTS PRO
scope of supply	<ul style="list-style-type: none">• ESD case with foam insert• Voltage measuring head MK• Instrument stand• Hand electrode• 2m silicone cable
order unit	1 piece
content unit	1 piece
ESD safe	yes
