

Optimum 30/50/70cc caps and needle caps

Optimum® needle caps and end caps provide an airtight seal so you can pre-fill cartridges to save time, or seal partially used cartridges to reduce waste.

Our end caps sit securely on the cartridges and have a push button in the center that makes it easy to create a tight, airtight seal. The push button also gives the operator a visual indication that the end cap is correctly fitted.

EFD snap-on end caps fit 3cc, 5cc, 10cc, 30cc, 55cc and 70cc cartridges.

The end caps protect the mounting fluids with unique vent holes that prevent air from entering the cartridge during installation. The needle caps also feature a large knurled handle for easy installation.

Available in green and blue for easy color coding, Nordson EFD twist caps are available in one size fits all.

Item no.

WL74036
