

## Data Terminal DT2.1, new version

The DATA Terminal DT2.1 logs the measurement data of the Personnel Grounding Tester PGT120.COM

- Can be variably integrated into existing infrastructure
- Several PGT120.COM stations can be combined to form a network
- Existing company ID cards or time recording cards can continue to be used
- Customer systems can be connected via an open database interface
- Measurement data is available for further processing in just a few seconds
- Different databases can be used
- Combination with existing access systems is possible
- Secure, encrypted network communication
