

Soldering tip conical, curved, Ø 1, C250428E

This cartridge was developed with a thicker iron layer, which makes the tip ideal for heavy and repetitive work in mass production. The thicker iron layer also reduces thermal efficiency.

The C250 cartridges have been specially developed for use with the AP250 manual feed soldering iron.

These cartridges can be aligned using the anti-rotation screw built into the tool.

Thanks to intelligent heat management, they last 5 times longer than other brands.
