

MANTIS IOTA stereo microscope with VERSO universal stand

THE stereomicroscope for performance:

Mantis is an award-winning ergonomic stereo microscope that offers exceptional ease of use and outstanding 3D imaging. No cumbersome eyepieces mean a stress-free viewing experience. See more and realize more than is possible with conventional binocular microscopes.

See every detail, even on challenging objects:

See the finest details in a large, high-resolution, high-contrast optical stereo image. Whether you view your object in the eyepiece-less field of view or on a separate monitor, Mantis delivers the superior image quality you need to perform your inspection tasks accurately and quickly.

Work better longer:

The ergonomic design allows for relaxed, stress-free viewing and manipulation of your component or specimen, improving posture and reducing strain on your back and neck. In

Products for the electronic industry

addition, the eyepiece-less design reduces eye activity and therefore eye strain.

The stereo microscope for your applications:

The long working distance and excellent depth perception make the Mantis stereo microscope perfect for numerous applications, including: Electronics, Medical, Mechatronics, Aerospace, Automotive, Life Sciences and more.

- Best optical 3D stereo image
- Ergonomic working posture
- Long working distance
- Magnification 3x - 8x
- Quick-change objectives
- Synchronized LED illumination

Verso Universal Stand:

Versatile Verso stand allows the system to be raised and lowered into position as needed.

Dimensions:

- Height working area - 230 mm
- Projection - 380 - 505 mm
- Max. Object height - 166 mm
