

ESD safety shoes S3, ladies, PUMA SAFETY, VELOCITY 2.0 LOW, black

NEXT LEVEL OF CUSHIONING With the next generation of the MOTION PROTECT line, PUMA SAFETY has once again taken the pulse of the times. Behind the design-award winning look lies a whole power package of innovative features and comfort. Thanks to the exceptional sole construction with a double-foamed midsole made from IMPULSE.FOAM in different densities, the VELOCITY 2.0 BLACK LOW is ideal for long working days with lots of standing and walking. The IMPULSE.FOAM® in the midsole not only absorbs impact forces, but also actively returns up to 55% of the energy to the wearer. The non-slip rubber outsole (HRO, SRC), which is heat-resistant up to 300°C, provides safety with every step and is also extremely hard-wearing. Thanks to the evercushion®BA footbed, the foot is supported in its natural rolling movement. The highly breathable evercushion® foam wicks away perspiration and ensures a pleasant microclimate in the shoe. The anatomical shape with longitudinal arch support protects joints and ligaments from injury. The VELOCITY 2.0 BLACK LOW is also equipped with an elastic quick lacing system. This means that the wearer no longer needs to worry about the perfect shoe binding or open shoe laces. Each shoe box also comes with a pair of conventional laces.

- Protection: fiberglass toe cap, metal-free, flexible FAP penetration protection
- Upper: high-quality, smooth full-grain cowhide with TPU reinforcements
- Plus: metal-free, ESD, toe cap and heel protection, additional pair of cord laces in the box, quick lacing system
- Footbed: evercushion BA

Products for the electronic industry

- Lining: BreathActive functional lining
- Sole: MOTION IMPULSE - 300°C heat-resistant, non-slip rubber outsole with IMPULSE.FOAM midsole in two different densities for excellent cushioning, stability and comfort
