

## ESD safety shoes S1P, PUMA SAFETY, FUSE MOTION 2.0 LOW, gray

**NEXT LEVEL OF CUSHIONING** The new definition of the sports-inspired performance safety shoe line MOTION PROTECT is the perfect symbiosis of cushioning, energy return and design. A real innovation is the sole construction with innovative IMPULSE.FOAM® midsole with anti-fatigue technology for fatigue-free working. IMPULSE.FOAM® actively returns up to 55% of energy to the wearer and ensures maximum cushioning, outstanding stability and long-lasting comfort. The non-slip rubber outsole (HRO, SRC), which is heat-resistant up to 300°C, provides safety with every step and is also extremely hard-wearing. Thanks to FUSE.TEC® elements, there are no seams on the upper of the FUSE MOTION 2.0 -GREEN LOW, especially in the crease areas of the shoe. This makes the shoe light, flexible and robust. The evercushion®BA footbed supports the foot in its natural rolling motion. The highly breathable evercushion® foam wicks away perspiration and ensures a pleasant microclimate in the shoe. The anatomical shape with longitudinal arch support protects joints and ligaments from injury. The FUSE MOTION 2.0 GREEN LOW is also equipped with an elastic quick lacing system. This means that the wearer no longer has to worry about the perfect shoe binding or open shoe laces. Each shoe box also comes with a pair of conventional laces.

- Protection: Fiberglass toe cap, metal-free, flexible FAP penetration protection
- Upper: sandwich mesh with FUSE.TEC elements
- Plus: metal-free, ESD, toe cap protection, quick lacing system, extra pair of laces in the box

- Footbed: evercushion BA
- Lining: BreathActive functional lining
- Sole: MOTION IMPULSE - 300°C heat-resistant, non-slip rubber outsole with IMPULSE.FOAM midsole in two different densities for outstanding cushioning, stability and comfort
