

Safety shoes S3, TIMBER LOW, brown

DYNAMIC MULTIFUNCTIONAL SHOE. The model for the design and last development was the trekking sector. In addition to a sporty look, maximum comfort and maximum convenience with minimum strain on the foot - even over long periods of movement - have top priority. The upper of the TIMBER LOW is made of oiled, soft full-grain cowhide with abrasion-resistant textile inserts. The non-slip, self-cleaning sole profile of its TPU outsole has optimum liquid-displacing properties (windshield wiper effect). Standing water is diverted to the sides of the shoe to prevent aquaplaning. The sole is also oil and petrol resistant and antistatic. The BreathActive functional lining, which extends through to the toe area, ensures dry feet and comfort even on particularly long working days. Perfect protection of the wearer - always the focus of all ALBATROS® developments - is one of the most important aspects of this line.

- Protection: steel toe cap, metal-free, flexible FAP penetration protection
- Upper: oiled, soft full-grain cowhide with textile inserts
- Plus: closed dust flap
- Footbed: removable, anatomically shaped COMFIT insole
- Lining: breathable 3D mesh functional lining
- Sole: TREKSTAR WORK - PU/TPU sole with overcap and shock absorber

item number

WL82688

manufacturer	ALBATROS
