

## Pneumatic dispensing gun with different mixing ratios

---

Pneumatic dispensing guns with several mixing ratios have pressure disks with snap locks, which simplify the changeover of mixing ratios as no disassembly is required. A patented alignment and splash-proof plate stabilizes the cartridge to prevent the cartridge from tipping and spilling liquid. These guns feature an adjustable high performance aluminum air regulator and a quick release air valve that immediately stops the flow of material.

### Features

- Robust construction
- Ergonomic design
- Powered by air pressure

### Advantages

- Ideal for crack injection applications
- Better control for dispensing two-component materials
- Fast response times
