

## ProfCut™ Japanese pull saw, 6-8.5/17 ZpZ, 240 mm

- For fine, cross, angle and slit cuts
- The pulling method allows a very thin blade (0.5 mm), resulting in a very narrow kerf (0.75 mm), thus reducing the amount of force required
- Extra-fine, hardened JT serration on one side for perfect fine, angled and cross cuts in wood and pipes (e.g. plastic)
- The other side of the blade has a progressive, coarse toothing that is particularly suitable for cuts along the wood fibers
- The flexibility of the blade allows a cut flat to the surface
- Two-component plastic handle for high working comfort and a secure grip
- Spare blade PC-9-9/17-PS-B
- Comfortable screwed two-component handle
- Japanese pull saw toothed on both sides for fine, cross, angle and slitting cuts
- Extra-fine, hardened tooth tips, JT serration ground on three sides

Item no.	<b>WL83507</b>
Manufacturer	BAHCO
Manufacturer article no.	PC-9-9/17-PS
GPSR manufacturer data	BAHCO Werkzeuge Maybachstr. 10 DE-71711 Steinheim www.bahco-werkzeuge.de
Length	240 mm
Width	0.5 mm
Sales unit	1 piece
Content unit	1 piece
ESD compliant	no
Tool length	240 mm
