# Locking screw for the soldering iron holder

The locking screw for the JBC soldering iron holder is an indispensable accessory for precise and safe work on soldering stations. This screw ensures a stable fixation of the soldering iron in the holder, preventing it from slipping during the soldering process. Made from high-quality materials, it offers durability and reliability in daily use. The easy handling enables quick adjustment and ensures optimum hold. Ideal for professional users who value quality and efficiency. Available at Weidinger.eu.
