

Cleaner Oxyd-Off, 400ml

The ECS Contact Cleaner Oxyd-Off, 400ml, is a highly effective cleaner that removes oxide and sulphide layers from metallic contact surfaces. Thanks to specially selected ingredients, it offers long-lasting protection against sliding and corrosion. The use of this cleaner prevents and reduces faults caused by contact resistance and eliminates voltage losses. The functionality of all electromagnetic contacts is maintained in the long term. Simply use the spray can for application. Contents: 400 ml.

- Removes efficiently Oxide and Sulfide Layers from Contact Surfaces
- OXYD-OFF cleans contacts and efficiently removes oxide and sulfide layers from any metallic contact surfaces
- Special inhibitors ensure also long-lasting lubrication and corrosion protection
- OXYD-OFF reduces contact resistance that leads to failures, eliminates voltage drops and guarantees a long lasting protection of all electro-mechanical contacts
- It is used on switches of all types, sliding contacts, potentiometers, contact banks and relays
- Spray in aerosol can

- Content: 400 ml

Item no.	WL83847
Manufacturer	ECS
Manufacturer article no.	701.400.000
GPSR manufacturer data	ECS AG Talstrasse 35 CH-8808 Pöföfikon www.ecsag.com
Sales unit	1 piece
Content unit	1 piece
Incl. battery	no
ESD compliant	no
