

## Cleaner Spraywash, 400ml

---

ECS Cleaner Spraywash is a highly effective cleaner for soiled contacts and components. Thanks to a special combination of solvents, it enables the safe removal of dirt and grease deposits as well as oxide layers that have been converted by OXYD-OFF. The good creeping and flow properties ensure that soiling can be removed without any problems. The spray wash does not attack the most common materials and evaporates without leaving any residue. The handy spray can contains 400 ml of cleaner. Ideal for effective cleaning of your electronic devices and components.

- Powerful Cleaner and Degreaser for Contacts and Electronic Equipment
- SPRAYWASH is a powerful mixture of solvents which reliably removes dirt and grease deposits as well as oxidized layers
- The product's good penetration and flowing properties enable to wash away any soiling without difficulty
- SPRAYWASH does not attack any material in common use and evaporates completely after a short time without leaving any residue
- SPRAYWASH is ideal for intensive cleaning of contacts, components and equipment in
