

Thinner Plastic 5 Liter, 5 Lit.

Our ECS Plastic Thinner in the practical 5-liter canister is the ideal solution for your painting work. Thanks to the individually adjustable mixing ratio, you can tailor the flow behavior exactly to your requirements. Whether for spray applications at a ratio of 1:1 or for thicker coats with a ratio of 3:1 - with the ECS thinner you will always achieve optimum results. Make sure you only use suitable thinners to ensure the quality of your work. With ECS Plastic Thinner, you get a quality product that guarantees professional painting results.

- Thinner for ECS PLASTIC
- The mixing ratio always depends on the type of spray application or dipping process.
- Depending on the desired flow behavior, the appropriate amount of diluent must be added to the concentrate.
- For spray application, a dilution in a ratio of 1:1 is recommended, which results in very good leveling behavior with a low layer thickness.
- For a higher layer thickness, a mixing ratio of 3 parts concentrate to 1 part thinner can be used.

- Attention: Water-based solvents and alcohols must not be used for dilution.
- Can
- Contents: 5 liter

Item no.	WL83861
Manufacturer	ECS
Manufacturer article no.	775.L05.000
GPSR manufacturer data	ECS AG Talstrasse 35 CH-8808 Pöfikon www.ecsag.com
Sales unit	1 piece
Content unit	1 piece
Incl. battery	no
ESD compliant	no
