

Compressed Gas Spray ELIX, Non-Flammable, 300ml HIGH PRESSURE

The ECS compressed gas spray ELIX is a highly effective cleaning agent for vending machines and devices in the electronic and technical sector. With its very high pressure and purity, it efficiently removes dirt deposits down to the finest dust particles, thereby increasing the operational safety and functionality of the devices. The use of this non-flammable spray greatly reduces equipment failures due to contamination. Cleaning can be carried out quickly and efficiently thanks to the spray head and tube of the aerosol can with a capacity of 300 ml. With the ECS compressed gas spray ELIX, even inaccessible areas can be cleaned easily, extending the service life of your appliances and optimizing their performance.

- For machines and devices in the electronic and technical sectors
- Efficiently cleans inaccessible areas
- Removes dirt deposits down to the finest dust particles
- Very high pressure strength, high efficiency, high purity

Products for the electronic industry

- Non-flammable
- Increasing the operational safety and functionality of the devices
- Equipment failures due to contamination are greatly reduced
- Cleaning can be carried out quickly and efficiently
- Compressed gas spray in an aerosol can with spray head and tube
- Contents: 300 ml
