

Torque wrench, reversible ratchet, Clicke-Torque B 2, 3/8", 20-100 Nm

The Click-Torque series was developed to make working with torque wrenches simple, precise and reliable. It is ideal for all screw connections where controlled tightening with a defined torque is required.

The desired value can be set quickly and safely using the main and fine scales and is audibly and perceptibly engaged when the mark is reached so that the set value remains reliably fixed.

The reversible models are designed for clockwise tightening and impress with their robust design as well as simple and safe handling in everyday use.

- 3/8" square drive with reversible ratchet and 45-tooth mechanism
- Torque value is easy to set and is noticeably and audibly secured when the scale is reached
- Controlled work thanks to clearly perceptible triggering when the set value is reached
- Measuring range from 20 to 100 Nm with an accuracy of $\pm 3\%$ in accordance with DIN EN ISO 6789-1:2017-07
- Main scale graduation: 0.5 Nm
- Secondary scale measuring range: 15-73 lbf. ft.
- Clock diameter: 47 mm
- Comfortable 2-component handle for ergonomic working in clockwise tightening mode

Item no.	WL84109
Manufacturer	WERA
Manufacturer article no.	5075611001
GPSR manufacturer data	WERA Werkzeuge GmbH Korzter Strasse 21-25 DE-42349 Wuppertal-Cronenberg www.wera.de
Width	60 mm
Height	18.5 mm

Products for the electronic industry

Sales unit	1 piece
Content unit	1 piece
Incl. battery	no
Measuring range	20-100 Nm
Handle length	140 mm
ESD compliant	no
Blade length	405 mm
